How do I toggle the watched status of titles, series, seasons or episodes?

Question:

How do I toggle the watched status of titles, series, seasons or episodes?

Answer:

There are different ways os marking a title watched - on the title or episode details page you can scroll to the last page, where there is an "actions" page, including a watched toggle button.

You can also use your remote control to toggle the watched status by pressing the "Clear" button on the remote, or you can use your keyboard to press Ctrl+W to toggle the watched status.

The remote and keyboard shortcuts will also function for entire TV Series or Seasons to mark all episodes as watched.

Notice! The "actions" page on the title or episode details page can be disabled in the Collection Management program, under "Tools", "Options", "Media Center Interface", which can cause this page to not be available in your interface.
