The interface in Collection Management looks wrong

Symptoms:

The interface in the Collection Management program looks incorrect, and some areas overlaps each other in the editing area.

Cause:

You are running an increased front size on your PC, which the Collection Management program does not support.

Solution:

In Windows 7 or Windows Vista, right click your desktop and select "Personalize". In the bottom left corner, click "Display" and set the font size to "Smaller - 100% (Default)". It is not possible to run the Collection Management program with increased font sizes.
