Error 536870913 when installing SQL Server

Issue:

I receive the error number 536870913 when the My Movies installer attemps to install SQL Server.

Cause:

The SQL Server installer file downloaded by the My Movies installer have corrupted during download.

Resolution:

The My Movies installer downloads the SQL Server installer to the file "C:\ProgramData\My Movies\SQLEXPR32.EXE". Delete this file, and run the My Movies installer again, which will cause it to re-download the SQL Server installer executeable.

Notice! The folder "C:\ProgramData" is a hidden folder. The easiest way to open the hidden folder is to type in "C:\ProgramData\My Movies" directly in the typing area in the Windows start menu, and click enter.
